The following was posted to the BA list and is now
forwarded to the GB list in case there're some non-
BA folk here.

>
> In this day of outta-sight rack panel prices, some

Just want to say thanks to the glowbugs. This is one of the most
laid back, fun lists I subscribe to. Sure, not a lot of traffic, but I
can't recall a single instant of flames of any sort. Everytime I have asked
a question or made a comment, I have always gotten great and informative
responses. Let's keep it up!

ps - what you all think of using a 6C4 as a triode rf amp for the swinging
regen to isolate the antenna? Going to be used in a untuned mode ala rocky
regen. Main requirement, I had the tube on hand!

I need a 5861 tube for a Marconi TF1066 Signal Generator. It is also known as CV273 (British Military) or Mullard TD03 10. Also EC55 I think. I know AES has these but they require an arm and a leg. I wonder if anyone out there has maybe a good used one which would only require perhaps an arm? This is a disc seal triode.
Thanks guys
73 de Dave KI6QE/7
